Jeny is registered in an agency in the hostess service, an agency which recruits young and pretty young women for trade shows, for representation needs or even for reception services, but is also registered in the communication department, an agency which recruits journalists, photographers or directors. This is not the first time that Jeny has been considered for a job and this time she is hired as a camera operator.

Jeny arrives at the reception of the building where her meeting takes place. She introduces herself and a young man accompanies her to an office set up as a studio so that she can set up her equipment, her tripod and her camera. The on-site communications manager describes his needs and the context of the short report. It is a talk show between two people who will be seated opposite each other around a table. Jeny must stay in a fixed shot but can take close-ups depending on who is speaking. Another operator will be positioned to his left with a camcorder for tight ambient shots. The lighting and reflector have already been positioned.

Jeny positions herself and carries out her first sound, light and framing tests while the two speakers take their seats. Without saying anything to anyone, she hid a small camera behind her that will film her from behind. It's a challenge that her husband Alex threw at her. Act as naughty as possible during your job. Over her tights, she wears a mini-skirt and thigh-high boots.

Everyone is in place. Engine. It's just started and Jeny is already pulling up her skirt and revealing half of her butt. When she bends down to check the screen of her camera, we can see her pussy despite the pantyhose. What a view ! Does the guy with the camcorder to his left notice anything? It seems so because sometimes his gaze turns towards her. Now she runs her hands over her buttocks and caresses herself. Even naughtier, she faces her little camera to show her pussy. Her seamless tights show the view is very pleasant.

As she crouches, we can clearly see her landing strip. This time she returns to her working position and passes her hand into her crotch to play with her labia. She decides to spread her buttocks, she shows her asshole and at that moment her neighbor on the left noticed her game. The report ends and Jeny leaves with her equipment without forgetting her little camera. Alex will be delighted.
