

## Review for photoshoot “Photos for husband”

Jeny contacted a beginner photographer and explained that she wanted to give her husband sexy and naughty photos. She explained the scenario to him and you will understand everything if you watch the video made during the photo shoot. After finding a good spot in the undergrowth, Jeny was tied to a tree with the arms behind the back. Then she asked him to lift up her skirt. Her pussy was now exposed. (Alex regretted that she revealed herself so quickly) Still following her script, Jeny found herself naked in front of the camera lens. How did the photographer react and what did they talk about together? Jeny, more and more naughty, caressed herself before asking him for a good spanking. What should you look at first, photos or video? For me, it doesn't matter. Everything is incredibly erotic.
