

Video 728 “Teachers Secret Side Job Exposed”

Turning a green blanket into an erotic fantasy

The Chromakey videos: Jeny’s acting skills and Alex’s editing technique

The initial reason for Chromakey and AI-generated surroundings

Locked down in the first Covid year, bound to their home, isolated from the public, Jeny and Alex had to look for solutions how to produce erotic videos for their subscribers. And they did, shooting POV videos where Jeny is meeting virtual guys, first at home doing stretching exercises, later also in parks. While the first stretching video had a pure white background, the next videos became more and more elaborate. The highlight was a “stage performance” of a three-girl-band “JenySmithCho”, with three Jeny’s performing together some pop songs. Other guests in the concert were represented by Jeny and Alex, the background was generated and replaced the real background Jeny performed in front of: a green cyclorama, nothing more as a green blanket. Several other videos with this greenscreen technique (called Chromakey) followed, a TV news and weather report studio, a subway wagon, a classroom, a discotheque ...

New rules require Chromakey technology again

After the Covid years, there sadly appeared the next reason to do Chromakey videos. Adult videos with real people in the background became more and more complicated because of new rules by billing companies: an age check for all passers-by appearing in the video, with a signed consent ... hardly possible for video shootings in crowded situations. And so one of the fantasies of Jeny, masturbating with spread legs in front of a crowd, was only possible in this Chromakey version.

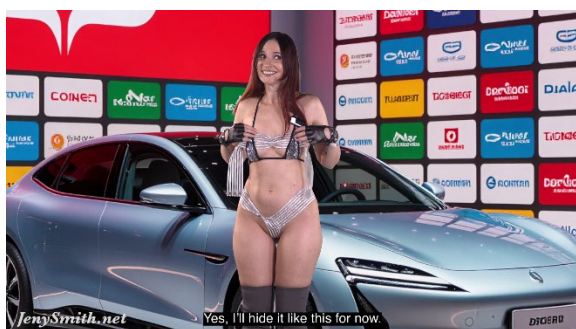

A shy teacher turns into an erotic goddess

In this new video, Jeny acted as a teacher first, writing formulas on a whiteboard in front of her class. For those who know Jeny: in fact, she had been a teacher before she started to become Jeny Smith. So the situation was somehow real. The teacher told her students that she will be a promo girl in a nearby car exhibition. What the teacher did not know in advance: when arriving in the changing room, she detected that the outfit for her performance in front of a car booth was very revealing – more a kind of straps being panties and top. And a skirt with lots of zippers.

Jeny's erotic fantasy: masturbating in front of a crowd

In front of the virtual public, Jeny teacher became more and more daring, strip-teased in front of her audience (some of her students among them), changed clothes to even more revealing ones, and she concentrated on one of her guests imagining performing for him only and forgetting about the crowd.

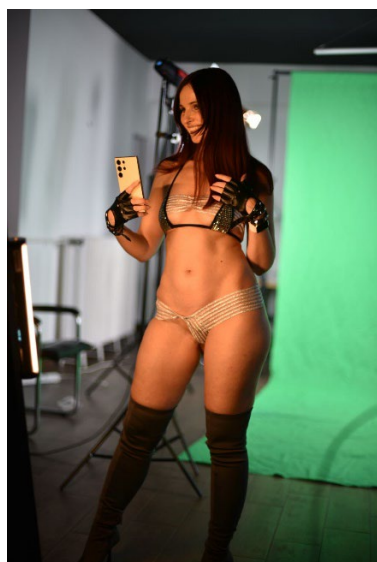

Jeny asked to get a chair, sat down with spread legs and started a long masturbation scene – ended up in a juicy result, showing her famous “success smile” after finishing. And wet Jeny, the spread legs high in the air, now invited the crowd to film her, to make photos of her.

As a viewer, you get more and more pulled into this scene. At the end you will wonder whether you really attended a car exhibition in the last week ... and meeting a beautiful former teacher of yours there. It is an astonishing ability of Jeny, to let her viewers feel as if they are part of the scene – an ability that can often be seen in Jeny’s all-by-herself adventures where (lonely) Jeny is in fact only talking to her camera ...

[Acting on a green blanket: behind the scenes](#)

For 45 minutes, Jeny acted in the changing room or in the exhibition hall in front or behind the hood of the car. But in reality, she had to imagine this all, the surroundings, the exhibition visitors, the students of her class, the guy for whom she was performing ... in reality, the surroundings for the whole video was their office, now equipped with this green cyclorama – a long blanket covering the space behind Jeny and the floor under her feet. (And big thanks to Jeny and Alex for providing me with behind-the-scenes photos out of their private archive!)

[Alex's editing: Replacing all the green by an AI generated background](#)

Last but not least, after Jeny's acting on this green blanket and capturing the scenes with a video camera, Alex had to edit the video to replace all the green with the matching background. While generating changing rooms and exhibition halls full of car booths is the easiest step here, the adjustments that background and performing Jeny are fitting together, without visible artifacts, is the more complicated task. It's easy to make the boots of Jeny hovering over the floor, looking artificial – so in this case, it was Alex's skills that made posing and stripping Jeny looking natural on the floor of the booth.

[An enjoyable erotic movie](#)

Some subscribers have been complaining that Jeny did this "only" in an AI generated environment. Yes, Jeny is perfect when meeting real victims, in her office, to tease them to the extreme! Jeny is perfect when walking outdoors in a revealing outfit and flashing "accidentally" when possible. But this fantasy of Jeny wouldn't be possible when Jeny would be a promo girl in a real car exhibition. And it is so much more enjoying to see Jeny living and realizing her fantasy than to only read about her fantasies in replies on her site. Thank you so much, Jeny and Alex, that you pulled us into this scene, that we could virtually be part of this scene!
